CORE COMPETENCIES

We combine logistics and technology competencies to deliver superior supply chain and technology solutions either on a project or recurring basis. We work in partnership with the sales teams and customers from presales and solutioning, to delivery. Services include:

- IT and Telecommunications hardware sales
- Managed Services; break fix, help desk, warranty repair
- Asset management, tagging, RFID and tracking
- Rack and stack, Enterprise deployment, and Data Center configuration
- Imaging, asset tagging, etching and configuration
- Warehousing, kitting and staging
- Transportation, delivery and installation
- Asset recovery, data wipe, "clean and screen" and disposal
- Microsoft stack and consulting services
- Application development and image creation
- Virtualization of desktop and servers
- Staff Augmentation
- Managed Print solutions and software
- Data Center efficiency and cleaning

We employ more than 130 personnel in Texas and have numerous other employees deployed throughout the US on Projects. The company is headquartered near Dallas/Fort Worth International Airport, the fourth busiest airport in the world, with accessibility to four major highways, close to two major railway intermodals and inland ports, and can reach 95% of nation in 3 days using USPS, FedEx and UPS. We have other facilities in Washington DC, Austin and San Antonio and access to partner facilities across North America to support most requirements.
